◆ Observances for working remotely or telecommuting

- Refrain from producing, processing, or storing classified data or documents when working from home or remotely.
- Ensure that you adhere to the same security policies as those applied to PCs on campus. This includes keeping your software (OS, antivirus, etc.) up to date with the latest security updates and conducting real-time virus scans.
- Avoid working remotely or telecommuting on a PC that is shared among an unspecified number of people, such as in an internet café.

※ By logging in, it is considered that you have agreed to comply with the above content
